

MARKET DATA ANALYSIS

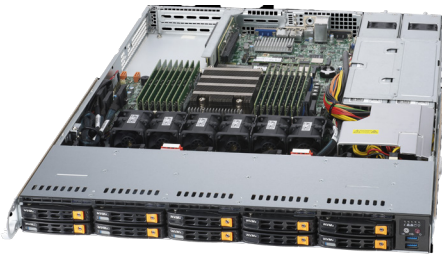

FINANCIAL SOLUTION Featuring WekaFS

ICC now offers Financial Systems featuring WekaFS to deliver the best possible wall clock time for new latency sensitive simulation workloads in the High Frequency Trading environments.

**PRE-CONFIGURED
SOLUTIONS WITH
FAST WALL CLOCK
TIME FOR
BETTER TRADING**

FEATURED 1U FORM FACTOR FINANCIAL SOLUTION A+ SERVER 1114S-WN10RT

- » **Single AMD EPYC™ 7003/7002 Series CPU**
- » 16 DIMMs; up to 4TB 3DS ECC
- » DDR4-3200MHz RDIMM/LRDIMM
- » 2 PCI-E 4.0 x16 (FHHL), 1 PCI-E 4.0 x16 (LP)
- » 10 Hot-swap NVMe/SATA3 hybrid drive bays
- » 750W Redundant Platinum Level PSUs

INDUSTRY LEADING PERFORMANCE AT SCALE

ICC *wekaFS* preconfigured *storage solution* achieves *maximum acceleration* and *superior performance at scale*. The solution delivers over *10x* more performance than *all-flash scale-out NAS* and *3x* more than locally attached *NVMe SSDs*, while supporting *high-throughput, low latency* and excellent *metadata performance* at extreme scale.

- » Built for the cloud
- » Multi-protocol ready
- » Shared storage architecture
- » Built-in durability
- » Optimized for NVMe
- » Advanced security

FINANCIAL SYSTEMS FEATURING WekaFS ALLOW YOU TO DRAMATICALLY REDUCE TIME TO TRADE WITH A HIGH BANDWIDTH LOW LATENCY FILE SYSTEM

WekaFS ADVANTAGE FOR FSI

- Delivers Higher Performance Than Local-Drive SSDs
- Enables Elastic Public Cloud for Peak Compute Demand
- Single Storage Platform for Entire Dataset
- Dramatically Improves Wall Clock Time
- On-Demand Scalability and Economy
- Best TCO Leveraging NVMe for Performance and HDD for Capacity

WEKA FILE SYSTEM IN A PRODUCTION ENVIRONMENT
