

## Server Technician

### Job Description

Are you good with your hands? Do you have an interest in computer hardware? The Server Technician position may be a perfect fit. We are looking for a consistent, reliable, and hard-working individuals who will build enterprise computer systems on our production floor.

ICC pay's 80% of medical as well as common company benefits.

### Responsibilities:

- Assembly and manufacturing of enterprise IT hardware including servers, storage systems, workstations, and other systems
- Working with production and floor managers to ensure on time completion of manufacturing projects

### Requirements:

While specific experience with IT hardware is not required, candidates should have a willingness to learn about computer systems. Attention to detail is a must, as is being comfortable in a fast-paced, small-business environment and working independently with minimal oversight.

### How to Apply

Please send your resume to [HR@icc-usa.com](mailto:HR@icc-usa.com) to apply for this position.
